Education

National Institute of Technology Delhi (NIT Delhi)
B.Tech. in Electrical Engineering
PSM Public School
CBSE Class XII (Science), **Percentage: 90%**

New Delhi, India
Aug 2023 – May 2027 (Expected)
New Delhi, India
Apr 2021 – Mar 2022

Technical Skills

Languages: JavaScript, C++, C, Python
Frontend: React.js, Bootstrap 5, Tailwind CSS
Databases: MySQL
CS Fundamentals: Data Structures & Algorithms (Java)

Experience

Benchwork Technologies – FrontEnd Development Trainee (Jun 2025 – Jul 2025, Noida)

- Completed internship in the **Software Development Department** under the guidance of the team lead.
- Gained hands-on experience in **front-end technologies** and contributed to development tasks and UI improvements.
- Demonstrated **hard work, punctuality, and integrity**, receiving an “**Excellent**” performance rating from supervisors.

Programming Achievements

- Solved **100+** algorithmic problems on [LeetCode](#), improving expertise in **data structures, algorithms**, and common **coding interview patterns**.
- Engineered solutions for over **50+** **data structure and algorithm challenges** on coding platforms like **GeeksForGeeks** and **TakeUForward**, enhancing proficiency in **code optimization** and **algorithmic thinking** for web applications.
- Contributed to **open-source repositories**, including **bug fixes** and **feature enhancements**, increasing project **usability** and **maintainability**.
- Participated in **national-level hackathons** and **coding contests**, achieving high rankings while developing **full-stack solutions**.

Projects

Responsive Dashboard UI — React.js + Bootstrap 5

- Engineered a **scalable, modular admin dashboard** using reusable **React.js components** and responsive **Bootstrap 5 grids**, ensuring seamless adaptability across devices.
- Implemented **role-based authentication**, dynamic **data tables**, and **interactive charts** to enhance usability, accessibility, and maintainability.
- Optimized front-end performance by applying **state management best practices** and **cross-browser compatibility testing**, reducing reported UI defects by **20%**.

E-Commerce Frontend Clone — React.js + Tailwind + REST APIs

- Developed a high-performance **frontend e-commerce clone** with advanced **search, filtering, and cart management** features, improving user experience and engagement.
- Integrated with **REST APIs** for dynamic product rendering and applied **Context API** for efficient state management, ensuring scalability and responsiveness.
- Leveraged **Tailwind CSS** to deliver an optimized, mobile-first UI, improving page load times by **15%** and enhancing cross-platform consistency.

Sales Data Analysis Dashboard — Python + Pandas + Power BI

- Processed and analyzed **50,000+** **sales records** using **Python (Pandas, NumPy)** for data wrangling, feature engineering, and statistical analysis, uncovering actionable business insights.
- Designed **interactive dashboards in Power BI** with advanced **DAX queries, KPIs, and time-series visualizations**, enabling data-driven decision-making for stakeholders.
- Automated **ETL pipelines** for seamless data integration from multiple sources, reducing manual reporting time by **35%** and increasing reporting accuracy.
